

MESSAGE OF COMMISSIONER

Teachers are a valuable asset for a nation. Our history is replete with the names of great teachers, including Dr. S. Radhakrishnan, who inspire awe even to this day. It is, therefore, befitting that on Teachers' Day we recognize the contribution of our teachers who have educated, inspired and enlightened our students. An educational institution can make a name for itself only if it imparts quality education. KVS as an institution is known for imparting quality education and this has come about because of the immense contribution of our teachers.

The real goal of education is to equip students with a scientific temper, inculcate values of compassion & humanism and provide skills to help them cope adequately with life so as to become worth citizens of India. Education must emphasize learning with commitment to knowledge. To become role models for their students and to continue on the path of excellence our teachers must strive to improve because perfection itself is the ultimate goal.

I congratulate all the teachers for their sincere efforts. It is indeed a matter of great pride that KVS is undertaking several initiatives to face the challenges of quality education and is constantly moving ahead on the path of imparting holistic education.

My best wishes to all members of KVS family on this occasion.

(AVINASH DIKSHIT)
Commissioner
